Front-End Web Development Assessment: Replicate Landing Page

Hello,

Thank you for taking the time to participate in our web development assessment. The task involves replicating a landing page based on the provided template image. Given in drive.

Task Instructions:

- Create the HTML and CSS structure to replicate the template image.
- Ensure the website is responsive.
- Implement a navigation bar based on the template.
- Create a GitHub repository for your project.
- Commit your changes.
- Provide a README file with instructions on how to run your project locally.
- Share Github repository in form

Note:

Feel free to ask for clarification or provide additional information in your README file.

Thank you, and we appreciate your effort in completing this assessment!

Best regards,

Suchit Narayan
